

## Senior SW Project Analyst

### Company Presentation

Freemind is a specialised software company delivering products, solutions and services for Energy Efficiency, Building Management and ICT Solutions. The company enables partners to “Stay in Control” of complex technological infrastructures, to automate business and operational processes, and to improve energy efficiency.

Freemind was founded in 2003 and started with a team of managers and engineers with over 20 years of experience in delivering OSS services and ICT solutions to telecom operators and large corporations worldwide. By teaming up with partners, leaders in their application domains – Freemind extended its services to Energy Efficiency management, Integrated Security and Building Management.

Freemind ICT Solutions provide on-site and off-shore software development and testing for ICT system operations.

Freemind’s Web-Based Supervision and Control products and solutions enable the supervision and control of energy, technical and security aspects of infrastructures such as buildings and telecommunication networks.

Freemind is a growing Belgian company, with operations in Italy and Germany.

Our objective is to help customers :

- To increase operations efficiency
- To increase security of logical and physical assets
- To reduce costs for deploying eManagement Products and Solutions

Freemind is working for market leaders such as Belgacom, NMBS-SNCB, Alcatel-Lucent, Cegelec, Cofinimmo, Siemens, European parliament, etc., developing and providing added-value applications.

### Function

This person will be working on projects for one of our customers in the telecommunication domain.

The person will have to translate high level business requirements into a SW architecture. These requirements can be either small changes to existing processes/products/services or either completely new processes/products/services that need to be positioned in the SW environment of the customer.

In the first case, the person will need to understand quickly the current way of working and identify the needed changes in the complete environment. In the second case, the person will have to define the best way of implementing that new requirement on top of the existing SW components in place, potentially defining new software applications to fill up the missing functionality.

## Competences

### Required:

- Msc/Master in computer sciences or telecommunication or equivalent experience.
- Minimum 5 years of experience in the telecommunication domain
- Minimum 5 years of experience in software architecture/analysis work
- A proven track-record of software architectural activities in a big software environment (both for modifying small aspects and defining completely new functionalities)
- Experience in project management activities
- Driving licence.

### Personal skills :

- You speak FLUENTLY English, French and Dutch.
- You have excellent communication skills
- You have a professional and accountable attitude
- You are Customer Services minded
- You are flexible and have a result-driven approach
- You have a good organization
- You are a team player
- You have strong reporting capabilities
- You are eager to learn, autonomous, able to adapt to fast evolving environments.

### Location:

Your main working place will be located in Brussels at the customer premises.

## What we offer

- To join a team of multicultural young professionals.
- To become part of a fast growing company where people & team satisfaction is the key to success.
- We offer an attractive salary package tuned to your experience and other extra-legal advantages.
